

LIMBO Assembly Instructions

1. Select a level area to operate game with plenty of room to allow for a Line to form
2. Assemble framework as per sketch as follows:
 - a. Place the couplers on the 41" & 4' long poles to form the two side poles. Lay both poles on the ground parallel to each other
 - b. Place the tee fittings on top of the 41" poles in item "a"
 - c. Place a coupler between two of the remaining 41" poles to form a crossbar.
 - d. Attach one crossbar to the Tee fittings (leave eye bolts loose on top and bottom of Tee fittings)
 - e. Attach elbow fittings to remaining cross bar and place on top of the two side poles
 - f. Stand the unit up on the 4-way fittings and connect the 6-14" crimped tubes to the 4-way fittings to stabilize the frame.
3. Attach the canvas to the framework using the Velcro straps. Align Tee crossbar to bottom of canvas cutout and tighten 4 remaining eye bolts.
4. Place the Spring Clip Blocks on the upright side poles behind the canvas.

The blocks support the Bamboo Limbo pole and are adjusted as Limbo progresses.
5. If using the game outdoors, it is strongly suggested that you use the stakes provided on either side of the 4 way fittings.

Use sandbags if being used on pavement.
6. Never fold up canvas wet. Always allow to dry thoroughly

Parts List

1	Vinyl canvas	2	14" Tubes
2	4-Way fittings	4	Stakes
2	Elbow fittings	2	Bamboo rods
2	Tee fittings	2	Spring clip wood blocks
2	4' Tubes	6	Couplers
